

FOR EVERY STAGE

### Alex Lifeson Les Paul Custom Access, Ruby

In his work with Rush across several decades, Alex Lifeson has redefined the boundaries of progressive rock guitar, with playing that soars beyond the drama and the bluster to reveal truly stunning virtuosity that has been praised and admired by fans—and players—of all stripes.

Created through extensive work with Alex Lifeson and Gibson™, Epiphone's Alex Lifeson Les Paul™ Custom Access similarly redefines the boundaries of the classic Les Paul in an accessible, versatile package. This guitar carries all of the traditional tones that have made the Les Paul legendary, along with unprecedented levels of sonic and performance agility. The Alex Lifeson Les Paul Custom Access Standard carries powerful Epiphone Ceramic Pro™ neck and ProBucker™ 3 bridge pickups with push/pull coil splitting on the volume controls, along with a Floyd Rose® 1000 Series tremolo—the world's most efficient vibrato.

Along with all this, the Alex Lifeson Les Paul Custom Access still presents that timeless Les Paul look that has remained a classic for more than 60 years. Hardshell case included.
