

FOR EVERY STAGE

### Dave Grohl DG-335, Pelham Blue

Dave Grohl is an alternative rock legend who needs no introduction. A longtime Gibson user, his previous Gibson signature guitars have remained extraordinarily popular and command premium prices on the used market - when you can find one. Now Epiphone is extremely proud to once again partner with Gibson Custom on the release of the Dave Grohl DG-335. It features the combination of ES-335 and Trini Lopez model features Dave requested and that fans expect, including a semi-hollow ES™ body with bound diamond-shaped sound holes, a one-piece mahogany neck with an elliptical profile, Trini Lopez style headstock with Grover® Mini Rotomatic® tuners, laurel fretboard, and split diamond inlays. The pickups are Dave's preferred Gibson USA Burstbucker™ models, with a Burstbucker 2 in the neck and a Burstbucker 3 in the bridge position. They're wired to CTS® potentiometers, Mallory™ capacitors, and a Switchcraft® 3-way toggle switch and 1/4" output jack. This is one of the most requested models in Epiphone's history, so we are X-Static to offer this exceptional guitar to players worldwide. An Epiphone Dave Grohl hardshell case is also included.

### Specs
